

# 1912 Facts About the Titanic

## The Ship of Dreams

The RMS Titanic, fondly known as the "Ship of Dreams," was a colossal passenger liner operated by the White Star Line. It was one of three Olympic-class liners built between 1909 and 1911, the other two being RMS Olympic and HMHS Britannic. The Titanic's maiden voyage commenced on April 10, 1912, from Southampton, England, bound for New York City, USA.

Here are some intriguing facts about the Titanic:

- **Titanic's Dimensions and Weight:** The Titanic was a behemoth of a ship, measuring 882.5 feet (269 meters) long and 92.5 feet (28 meters) wide. It weighed an astonishing 46,328 gross tons, with a capacity of more than 2,200 passengers and crew.

- **The Unsinkable Ship:** The Titanic was hailed as "unsinkable" due to its innovative design features, which included 16 watertight compartments. Each compartment could be sealed off in the event of a hull breach, isolating the damage and preventing water from spreading to other sections of the ship. However, this design flaw proved fatal during the ship's fateful night.
- **Luxurious Interiors:** The Titanic was a floating palace, featuring opulent interiors designed to cater to the needs of both first-class and third-class passengers. The ship boasted a grand staircase, a smoking room, a gymnasium, a swimming pool, and even a Turkish bath.
- **Prominent Passengers:** The Titanic's maiden voyage carried an eclectic mix of passengers, including wealthy industrialists, celebrities, immigrants seeking a new life in America, and crew members from various backgrounds. Notable passengers included John Jacob Astor IV, Isidor Straus, and Margaret "Molly" Brown, who later became known for her heroism during the sinking.
- **недостаточно времени для посадки:** Despite its enormous size, the Titanic's lifeboat capacity was grossly inadequate. The ship carried only 20 lifeboats and four collapsible lifeboats, which were insufficient to accommodate all 2,200 passengers and crew in the event of an emergency.
- **Iceberg Collision:** On the fateful night of April 14, 1912, the Titanic struck an iceberg at approximately 11:40 PM ship's time. The collision tore a series of gashes into the ship's hull, flooding five of its watertight compartments. The damage was catastrophic, and the "unsinkable" ship began to sink.

- **Tragic Loss of Life:** The sinking of the Titanic resulted in the tragic loss of over 1,500 lives. The majority of the victims were third-class passengers and crew members, who were trapped below decks as the ship sank. The disaster shocked the world and led to significant changes in maritime safety regulations.
- **Discovery of the Titanic Wreck:** The Titanic's wreck was not discovered until September 1985, when a joint French-American expedition located the ship's remains approximately 2.4 miles below the ocean surface. The wreck site has since become a popular destination for explorers and researchers, providing valuable insights into the ship's final moments.
- **Legacy and Cultural Impact:** The Titanic disaster has left an enduring legacy in popular culture. The story of the ship's sinking has been immortalized in numerous books, films, and documentaries, capturing the public's imagination and continuing to fascinate generations. The Titanic remains a symbol of both human ambition and the fragility of life.

The RMS Titanic, once hailed as the pinnacle of maritime engineering, became a poignant reminder of the perils of hubris. The ship's tragic sinking in 1912 remains one of the most captivating maritime disasters in history, serving
