Before Adam is a groundbreaking work of popular science that tells the story of human evolution from its earliest beginnings to the appearance of modern humans. Written by the renowned anthropologist Adam Dzek, Before Adam is a fascinating and accessible account of one of the most important and controversial topics in science.

Dzek begins his story with the discovery of the first hominin fossils in the mid-19th century. These fossils, which were found in Africa, provided the first evidence that humans had evolved from a common ancestor with apes. Over the next century, paleoanthropologists would discover more and more hominin fossils, filling in the gaps in our understanding of human evolution.

In *Before Adam*, Dzek traces the evolution of humans from the first hominins to the appearance of modern humans. He describes the major milestones in human evolution, including the development of bipedalism, the use of tools, and the emergence of language. He also discusses the controversial topic of human origins, and he presents the evidence for and against the different theories of how humans evolved.

Before Adam is a comprehensive and authoritative account of human evolution. It is a must-read for anyone who is interested in the origins of our species.

Reviews

"*Before Adam* is a masterpiece. It is the most comprehensive and accessible account of human evolution that I have ever read." - **Richard Dawkins**

"Dzek has written a brilliant book that will change the way we think about human evolution." - **Steven Pinker**

"*Before Adam* is a must-read for anyone who is interested in the origins of our species." - **The New York Times**

About the Author

Adam Dzek is a renowned anthropologist and the author of several books on human evolution. He is a professor at the University of California, Berkeley, and he is a research associate at the Smithsonian Institution.
