Data management is a critical aspect of any organization's operations. In today's data-driven world, organizations need to be able to effectively manage their data in order to gain insights, make decisions, and improve their operations.

This special issue of the journal "Data Management" will focus on the latest advances in data management principles, technologies, and applications. The issue will cover a wide range of topics, including:

- Data modeling
- Data integration

- Data warehousing
- Data mining
- Data security

The issue will also include articles on the latest trends in data management, such as the use of big data and cloud computing. The issue will be of interest to researchers, practitioners, and students in the field of data management.

Call for Papers

We invite submissions of original research papers on all aspects of data management. Papers should be 8-10 pages in length and should be formatted according to the journal's guidelines. The deadline for submissions is March 1, 2023.

Submission Instructions

All submissions should be made through the journal's online submission system. The system can be accessed at the following URL:

<https://www.springer.com/computer/database+management/journal/40537>

When submitting your paper, please select the "Special Issue on Data Management Principles, Technologies, and Applications" from the drop-down menu.

Important Dates

- Deadline for submissions: March 1, 2023
- Notification of acceptance: May 1, 2023

- Final version due: June 1, 2023
- Publication date: August 1, 2023

Guest Editors

- Dr. John Smith, University of California, Berkeley
- Dr. Jane Doe, Massachusetts Institute of Technology
